B.E. Fifth Semester (Computer Science Engineering) (C.B.S.)

Object Oriented Programming

P. Pages: 2 NKT/KS/17/7350 Time: Three Hours Max. Marks: 80

- Notes: 1. All questions carry marks as indicated.
 - Solve Question 1 OR Questions No. 2. 2.
 - Solve Question 3 OR Questions No. 4. 3.
 - 4. Solve Question 5 OR Questions No. 6.
 - Solve Question 7 OR Questions No. 8. 5.
 - Solve Question 9 OR Questions No. 10. 6.
 - Solve Question 11 OR Questions No. 12. 7.
 - Due credit will be given to neatness and adequate dimensions. 8.
 - Assume suitable data whenever necessary. 9.
 - 10. Illustrate your answers whenever necessary with the help of neat sketches.
- What are the advantages / Benefits of OOPS. 1. a)

7

6

Write a program to declare a class Account having data members acc-number and b) balance. Accept this Data for 5 accounts and display the data of accounts having balance greater than 2000.

OR

OR

2. Explain copy constructor with suitable example. a)

- 6
- b) Write a program to declare a class Employee having data members as name, and basicsalary. Accept and display data for 02 employees.
- 7

7

3. a) How are operators overloaded? Illustrate with example.

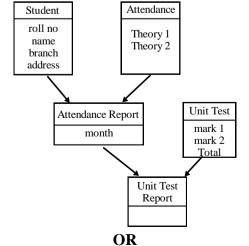

6

Explain Pitfalls of operator overloading. b)

Explain New and DELETE operator with Example. 4. a)

- 7
- b) Write a program to overload the + operator so that two strings can be concatenated.
- 5. Identify the following inheritance and write a program by assuming proper member functions.

14

NKT/KS/17/7350

P.T.O

Identify following Inheritance and write a program by assuming proper member function. 7 6. a) Customer Name Phone No Depositor acc no Balance Borrower Loan no loan-amt 7 b) Explain function overloading with example. 7. What is virtual function? Explain with example? a) 6 b) Write down the difference between static Binding and Dynamic Binding. 7 OR 8. Define ground function? What is static function? Illustrate friend function with proper 7 a) example. Explain the concept of virtual Base classes. b) 6 9. a) Write the syntax and use of getline() and write () function. 7 b) How will you create manipulators. 6 OR **10.** 7 a) What are streams? Why they are useful, explain in detail. b) How can a file be opened for both reading and writing. 6 11. a) What is generic programming? How it is implemented in C++? 7 What is the need for template function in C++? How are they created? 7 b)

OR

12. What is the need for Exception Handling. also explain multiple try-catch blocks. a)

7

7

b)

Write short note on:

NKT/KS/17/7350

- Associative containers.
- ii) Standard Template Library.
